

Where and how do I find funding?

Why?

It can be difficult to figure out how and where to apply for funding, when starting or having a project. We have therefore made a list of many different funding opportunities in the Nordic countries. Here you will get an overview of where you can apply for funding and links to the funds and organisations.

How?

Your task is now to read through the list and choose three funding opportunities that could be a possible fund to apply for financial funding for your project.

When you have made a list of three funds, write a small paragraph about your idea and try to 'pitch' it to the chosen organisation/fund.

Here you could have in mind:

- Research the fund, and what they have as interest.
- Research what criteria they have for funding applications and projects.
- What is important for the fund/organisation to know about the idea?
- How does the idea match and fit into the work they do as a fund?
- Why is your idea important and relevant for the fund to be funding?
